

Scalar Energy - The New Healing Energy

For most people, "healing energy" is not new. We have been using the energy from the "laying on of hands" to quartz crystals since the beginning of recorded history, from Jesus to Indian gurus. As time progressed, mainstream scientists figured out that everything is energy—from chemical energy in the body to the electricity used to power a light bulb—and realized that by merely changing the frequency and amplitude, they could develop technologies for specific healing treatments. Today, we see everything from TENS machines and laser surgery to the use of sound waves to break up kidney stones. In general, there are five basic categories for applying healing energy:

1. Direct application of energy to the human body.
2. Wearing or using a device or patch that functions as an antenna and draws selected healing frequencies out of the "ether."
3. Using specially designed materials to selectively concentrate and reflect back healing frequencies generated by the body itself.
4. The laying on of hands.
5. Embedding energy in a product, supplement, pendant, or patch, etc.

With that in mind, let's take a look at the five types of energy delivery systems in a little more detail.

1. Direct Application

This is the easiest method to understand, and potentially the most powerful. Examples include:

- The TENS (transcutaneous electric nerve stimulation) unit is a small, portable muscle stimulation machine which uses an electric current to relax muscles, improve blood flow and block pain.
- The controversial Rife Machine, first discovered by Royal Rife, applies select frequencies to the human body to destroy most viruses, bacteria, and even aberrant cells. He achieved spectacular results - so much so that on November 20, 1931, forty-four of the nation's most respected medical authorities honored Royal Rife with a banquet billed as "The End to All Diseases."
- The scalar generating watch used to block unhealthy man-made EMFs works by using a special chip that generates a fixed 8Hz standing wave to reinforce the body's own bio-electric field--protecting it from disruptive manmade frequencies.
- Probably the strongest and most effective direct application is to find a health practitioner who has a scalar energy chamber that you can enter and stay in for 30 minutes or longer, once or more a week. Not only do these chambers provide greater intensity, but most allow for adjusting frequencies for different/specific healing effects.

2. Antennas

Theoretically, by using or wearing the right kind of antenna, we can selectively extract, concentrate, or focus sub atomic particles and beneficial energies into our bodies. For instance, tachyon collection plates treated with a "secret" 14-day process capture particles (not seen by physicists) and channel them into the body to produce healing benefits. This seems far-fetched, but *does it work?* It does

appear to provide some benefit; however, the explanations surrounding them are often confusing, disjointed, and illogical. This doesn't mean the devices don't work to some degree, just that they may not work in the way explained.

3. Reflecting

One of the more interesting delivery systems are reflecting devices such as the Q-Link pendant. The principle is simple. At all times, your body is generating a complete spectrum of energies and frequencies - from the very beneficial to the not so beneficial. The reflecting devices selectively block a pre-chosen beneficial frequency from escaping, focus and concentrate it, and then feed it back into the body. However, as with everything else mentioned above, it has to be the right frequency.

4. Laying on of hands

The laying on of hands is a combination of Direct Application and Reflecting energy. The healer both sends energy generated by their own body out from their hands (actually measurable), while at the same time "adjusting" the patient's unbalanced energy fields. Although easy for skeptics to dismiss, it is unchallengeable for anyone who has experienced it - and in truth, theoretically sound.

5. Embedding

Finally, because all life is fundamentally energy based, it can hold a charge. This allows us to "embed" a healing frequency in a product or object and transfer that energy to the human body for healing. If you use scalar energy, the frequency will tend to stay in the objects indefinitely such as with objects you wear and supplements you ingest. The energy is held and transferred through crystalline structures in the body. For example, crystalline structures in every cell wall and liquid crystal structures in the collagen network comprising all of the space between cells are capable of holding a charge. If you read the book "*Lessons from the Miracle Doctors*," you will see photographs demonstrating the effects of eating supplements infused with scalar energy. Even though embedded scalar energy is a preset, fixed frequency, it offers three huge advantages: convenience, daily delivery, and cost effectiveness. Since scalar energy is so different from the standard electromagnetic energy you are familiar with, it is worth exploring further.

Scalar Energy

To back up, there are fundamentally two kinds of energy - electromagnetic wave energy (light waves, sound waves, electric current, etc.) and scalar standing wave energy. It was first presented in four ground-breaking equations in the mid 1800's by a Scottish mathematician, James Clerk Maxwell. Unseen and dismissed for over a century, today it is being used in everything from weapons research to protecting DNA, helping to eliminate cellular waste and improving circulation, immunity, and even memory.

Scalar waves are created by a pair of identical waves (usually called the wave and its antiwave) that are physically identical, but out of phase temporally in terms of time. Therefore, they look and act completely different from standard Hertzian electromagnetic fields: they are more field-like than wavelike. Instead of running along wires or shooting out in beams, scalar energy tends to "fill" its

environment and can pass through solid objects with no intensity loss. This becomes very important in terms of developing the technology for embedding objects.

Scalar Energy For Healing

More importantly, scalar waves implant their signature on solid objects to a much higher degree than all standard electromagnetic fields. This is extremely important when you embed the energy field in supplements, and then transfer that charge from the products into every cell of your body. Also, scalar energy can regenerate and repair itself indefinitely (unless erased by another energy field such as an airport X-ray machine). In other words, once you implant supplements, you can keep the energy there and regularly ingest the charged products over time.

The key to using scalar energy to heal comes from using the correct frequency and amplitude. Obviously, you don't want to charge your body's cells with the 60-cycle frequencies such as found in the alternating current that runs through your house. There are two primary healing frequencies. First is the Schumann Resonance, which falls in the 7.8 to 8 HZ range. The Schumann Resonance is the frequency the earth emits when there is nothing man-made and no plant or animal life around. The other primary healing frequency is 12 HZ, which is what you record in a rainforest when nothing manmade is near. As for secondary healing frequencies that can be measured coming from the hands of healers, they can usually be found in the 12-30,000 HZ range. Varying the combination of these frequencies can produce different health benefits. The art lies in knowing the right combinations.

Benefits of Scalar Enhanced Products

What health benefits are there to consuming scalar enhanced products (assuming the correct frequencies are used)? As it turns out, there are many - **AND THEY ARE PROFOUND**. Regular intake of scalar enhanced products can:

- Eliminate and nullify the effects of man-made frequencies (60 cps) in the human body.
- Increase the energy level of every single cell in the body to the ideal 70-90 millivolt range.
- Increase the energy covalent level of every single hydrogen atom in the body as verified by spectrographs. This is significant because covalent hydrogen bonds are what hold your DNA together and consuming scalar enhanced products can protect your DNA from damage.
- Improve cell wall permeability thus facilitating the intake of nutrients and the elimination of waste from each and every cell-actually causing every cell in your body to detox.
- Decrease the surface tension of the embedded products, thereby significantly reducing the time required for your body to assimilate those same products.
- Increase overall body energy levels as a result of increasing cellular energy for trillions of cells.
- Cleanse the blood improving chylomicron levels (protein/fat particles floating in the blood), triglyceride profiles, and fibrin patterns.
- Improve immune function by as much as 149% as proven in laboratory studies.
- Improve mental focus as demonstrated by increased amplitude of EEG frequencies.
- Balance out the two hemispheres of the brain, again as measured by EEG tests.
- Work as an antidepressant since it inhibits the uptake of noradrenaline by PC12 nerve cells.

Bio-Energized (scalar enhanced) supplement products will be absorbed faster, work faster, and produce stronger results because the effect is cumulative.

Conclusion

Curiously enough, although the medical community has a particular antipathy when it comes to most of the "new age" healing energy devices discussed in this article, it uses similar devices itself. What is radiation therapy but the direct application of high intensity energy to the body to achieve a specific healing result? And doctors freely use laser light for everything from brain surgery to skin peels.

Hopefully one day the medical community will be more open to the numerous healing energies, technologies, and techniques that exist. Until then, adventurous individuals will have to rely on their own research and intuition as they explore alternative healing technologies. The task can be daunting since valid clinical studies are, at best, rare. In the end, when you experiment with any of these energy devices, there is only relevant question: "Does it work for you?"
